REV. JOSEPH TORREY, D. D.,

PRESIDENT.

SAMUEL WHITE THAYER, M. D., *Burlington,*

PROFESSOR OF GENERAL AND SPECIAL ANATOMY.

WALTER CARPENTER, M. D., *Burlington,*

PROFESSOR OF MATERIA MEDICA.

DAVID S. CONANT, M. D., *New York,*

PROFESSOR OF THE PRINCIPLES AND PRACTICE OF SURGERY.

JOSEPH PERKINS, M. D., *Castleton,*

PROFESSOR OF OBSTETRICS AND DISEASES OF WOMEN AND CHILDREN.

R. CRESSON STILES, M. D., *Pittsfield, Mass.,*

PROFESSOR OF PHYSIOLOGY.

HENRY M. SEELY, M. D., *South Onondaga, N. Y.,*

PROFESSOR OF CHEMISTRY AND TOXICOLOGY.

EDWARD B. NIMS, A. B.,

DEMONSTRATOR OF ANATOMY.

SAMUEL WHITALL,

PROSECTOR TO THE PROFESSOR OF SURGERY.

S. W. THAYER, *Burlington,*

DEAN OF MEDICAL FACULTY.

THE UNIVERSITY OF CHICAGO

## Medical Department,

---

### THE NEXT ANNUAL COURSE OF LECTURES

WILL COMMENCE

THE LAST THURSDAY, BEING THE TWENTY-THIRD DAY OF FEBRUARY, 1865, AND WILL CONTINUE SIXTEEN WEEKS.

---

The Medical Faculty, in issuing their annual announcement, take pleasure in presenting to the members of the Medical Profession, their thanks for the continued favor and patronage they have extended to this Institution, and their donations to the Museum and Cabinet.

The Medical College-Building has commodious Lecture Rooms, and is supplied with all the improvements of the day, and is well calculated to promote the comfort and convenience of the occupants. It is situated on the South side of "College Green," and overlooks the town, the lake, and a large extent of surrounding country—in view of the Adirondack Mountains in the West, and the Green Mountain chain in the East,—the scenery is unsurpassed in beauty and grandeur by any other locality in the country.

### ANATOMY.

The course of instruction in this fundamental branch will be full and practical, and so illustrated by plates, preparations and dissections of the recent subject, that students may acquire a thorough knowledge of it. An ample supply of Anatomical material for dissection will be furnished students at cost. Students will receive the personal attention of the Demonstrator of Anatomy without any additional fee.

---

## PRINCIPLES AND PRACTICE OF MEDICINE AND MATERIA MEDICA.

It is the aim of the Professor of these branches to present a faithful view of the actual state of practical medicine, to dwell upon the important art of physical diagnosis, and by the aid of plates, models, wet and dry preparations, convey correct notions of the morbid changes, occurring in different diseases ; to consider the *Modus Operandi* of medicines, and discuss their mechanical, chemical and vital modes of action, exhibit specimens of nearly all the medicinal substances recognized by the United States Pharmacopœia and give a succinct account of their physical and chemical properties, preparation, adulteration, dose and mode of administration, and their physiological and therapeutical action.

## SURGERY.

The Department of Surgery is abundantly supplied with specimens, plates and casts in Morbid Anatomy, with surgical instruments, splints, and modern surgical appliances, to enable the Professor to illustrate the principles and practice of this branch. All important operations will be performed upon the *cadaver* in the presence of the class, and particular attention will be paid to the application of splints, use of instruments, surgical apparatus and dressings.

## OBSTETRICS AND DISEASES OF WOMEN AND CHILDREN.

In this Department the Professor will not consume the time and weary the attention of students with minute Anatomical descriptions ; he will refer them to the Lectures on Anatomy, recapitulating only what is necessary to explain subjects to be discussed by him. He will be able, by the aid of the manikin, plates and models, to demonstrate the mechanism of labor (the basis of successful and scientific midwifery practice) with such accuracy that no student is excusable who fails to master it properly. The diseases of females will receive particular attention, and every effort will be made to indoctrinate students in this branch of practice.

## PHYSIOLOGY.

It will be the aim of the Professor, in this Department, to give a course of complete and scientific instruction, by means of experiments, microscopical demonstrations, and plates. Although the highest triumphs of Physiology are the prevention and cure of disease, yet zeal in its prosecution and interest in its teachings can only be aroused by demonstrations and experiments on living animals.

### CHEMISTRY AND PHARMACY.

In the Department of Chemistry and Pharmacy, there will be an extended course of Lectures, accompanied with full demonstrations and experiments. It will be the object of the Professor, in this Department, to make it as full and as perfectly adapted to the wants of the Medical student as possible.—Special attention will be given to Toxicology—to Incompatibles—to tests and analyses of Urines, and in general to Physiological Chemistry.

The apparatus of the Chemical Department is, it is believed, second to none in fullness and capacity of illustration. Students wishing to acquire a practical knowledge of the methods and analysis and of the principles of General Chemistry, will be accommodated in the laboratory, under the direction of the Chemical Professor.

### CONDITIONS OF MEMBERSHIP.

At the commencement of the Session, every Student is required to call on the Dean and enter his name and place of residence, and the name and place of residence of his preceptor, in the Register, and pay all fees for the course.

#### FEES.

MATRICULATION,	- - - - -	\$ 3 00
DEAN'S CERTIFICATE, (entitling the holder to the		
Tickets of each Professor,)	- - - - -	50 00
GRADUATION,	- - - - -	18 00

Students who have attended two full courses in other regular Medical Institutions, will be admitted upon the payment of the Matriculation fee, and a fee of \$10. Graduates of this and other regular Medical Schools are invited to attend the Lectures, free of charge.

#### GRADUATION.

There are two periods for conferring degrees ; one, at the close of the annual course of Lectures in June, the other at the close of the annual term of private instruction in Burlington. Candidates must have attended two full courses of Lectures, one in this Institution—must have studied medicine three years with a regular physician, and have attained the age of twenty-one years. Each candidate is required to write a thesis upon some subject connected with the Science of Medicine, and deposit it with the Dean. Full and formal certificates of age, term of study, and of moral character must be furnished.

---

### CLINIQUE.

On Saturday of each week a Medical and Surgical Clinique will be held at the Dispensary.

Patients presenting themselves before the Students at the Clinique for Medical and Surgical treatment, are admitted free of charge. A large number of patients avail themselves of this charity annually, affording Students an opportunity of witnessing a great variety of Surgical operations, and the treatment of many diseases, both acute and chronic.

### TEXT BOOKS.

Students are requested to come provided with one or more Text Books of Anatomy, Physiology, Chemistry, Surgery, Obstetrics, Theory and Practice of Medicine, Materia Medica and Therapeutics.

### PRIVATE INSTRUCTIONS.

There will be two terms, of three months each, of private instruction given at Burlington, by Professors Thayer and Carpenter, consisting of Readings, Recitations, Lectures and Demonstrations in various branches of Medical Science. Students will also have an opportunity of attending Lectures in the University, on Natural History and other scientific subjects.

The autumnal term will commence in the early part of August, the winter term about the first of December. During the winter, particular attention will be paid to Anatomy, and Students will be supplied with an abundance of Anatomical material for dissection, at cost.

Board from \$2.00 to \$4.00 per week. Rooms for Students who wish to board themselves.

Students are invited, upon coming to Burlington, to call upon Dr. Thayer, corner of St. Paul and Bank sts., who will be happy to afford them any information and assistance in his power. All those wishing for further information may address, by letter, Dr. S. W. Thayer, *Dean of the Faculty*, Burlington, Vt.
